Conference Goals

You are invited to the Ninth Statewide Conference in Universal City, California, at the Sheraton Universal Hotel from November 7-8, 2012. The conference will provide an important opportunity for key stakeholders (policymakers, service providers, administrators, educators, researchers, consumers, families, volunteers, and peers) to explore emerging best practices for providing integrated care to those with co-occurring disorders (COD).

This conference will focus on the transformation of systems to improve client care. This focus will be achieved by housing forums to expand collaboration among multiple systems of care, including mental health, alcohol and drug treatment, primary care/health, criminal justice, education, and child welfare.

The theme for this year's conference is: "Integrating Substance Use, Mental Health, and Primary Care Services: A Bridge to Health Reform." The conference will explore comprehensive screening, assessment, and treatment for individuals with co-occurring disorders, and will highlight local and national innovative approaches to integrated care. Conference participants will have the opportunity to engage in active dialogue with one another on the challenges of providing integrated treatment across systems of care.

The Conference Objectives are as follows:

- To identify successful models within existing systems as we move in the direction of service integration under health reform.
- To increase collaboration between Substance Use, Mental Health, and Primary Care agencies serving COD clients.
- To identify emerging best practices that address the complex needs of clients with co morbidities.

The plenary presentations, workshop sessions, and displays featured in the foyer will provide an opportunity for conference attendees to interact and network with colleagues and speakers. Conference attendees will be able to participate in both experiential and didactic learning workshop sessions.

The 2012 Statewide Conference is, again, a 'green event.' All planning and execution efforts have been done with mindfulness toward our environment and resource sustainability. Conference planning, marketing, publicity, invitations and registration were created paperless from the start, with this standard at the forefront. Attendees and Speakers are strongly encouraged to utilize electronic media for viewing hand-outs and materials. Presentations will be available to download prior to the conference on the conference website.
