In collaboration with:
The 14th Annual Statewide Integrated Care Conference will be held in Universal City, California, at the Hilton Universal Hotel on October 25-26, 2017. This year’s conference theme is “Integrating Substance Use, Mental Health, and Primary Care Services: Resilience in a Changing Environment.”

The neighborhoods we live in influence our behaviors and affect our health in profound ways. Social and economic factors in our communities are linked to physical and mental health disorders, illiteracy, homelessness, substance use and higher mortality rates. Through the conference, we hope to bring together physical health, mental health, and substance use disorder treatment providers to strengthen partnerships and to highlight innovative strategies that address these chronic conditions within our diverse communities.

This year we are honored to welcome Dr. Cheryl Grills and Mr. Joseph Green as our opening plenary speakers. Dr. Grills is a Clinical Psychologist and tenured full professor at Loyola Marymount University. She is a national past President of the Association of Black Psychologists and founder of Imoyase Community Support Services. Dr. Grills currently serves as a Los Angeles County Commissioner on the Sybil Brand Commission for Institutional Inspections, which focuses on conditions and practices within county jails, probation and correctional facilities, and group homes for foster children.

Mr. Joseph Green acts as the Youth Program Coordinator at ‘Split This Rock’, a Washington DC based poetry and social justice organization. Mr. Green supervises youth programs, including creative writing workshops in more than 25 high schools. He was the co-founder and program manager of Poetry N.O.W., a creative writing program for students in the DC metro area, where he developed a creative writing curriculum now used in classrooms throughout the country.

Once again, the planning committee has developed thematic tracks that recognize the importance of addressing the needs of specific populations and of system transformation. Attendees may follow tracks (including but not limited to LGBT issues, primary healthcare, children and transition-age youth, and criminal justice) through the breakout sessions, or mix and match content to meet their own interests. All workshop presenters will address how their specific topic area relates to the theme of integration and resilience in a changing environment.

Meeting the needs of our communities through the provision of timely, effective, and well-coordinated services that address the unique needs, values and cultures of those served is the keystone of our collective efforts. In this 14th Statewide Conference, we seek to further this goal within the context of uncertainty as we navigate yet another series of transformative changes to the health care delivery system. Our intent is to help providers streamline access to care, increase responsiveness to the needs of the individuals we serve, and improve coordination of service delivery.

To this end, the conference goals are as follows:

- To facilitate attendees’ ability to coordinate services to improve healthcare integration and collaboration for mental health, primary care, and substance use disorder services.
- To help attendees identify the characteristics of services and providers that best support health, wellness, and recovery.
- To provide access to information regarding emerging best practices for treating the complex needs of those with co-morbidities and strategies for implementation.
- To provide attendees with learning opportunities that enhance their skillset to further improve treatment outcomes.
